

23 July 2019

Dear resident,

We are writing to inform you that we will be temporarily closing Hyde Road – from the Pitfield Street junction up to Northport Street – over the next four weekends to enable us to continue installing gas, electric, water and district heating services for the new leisure centre, school and affordable homes we are building.

What is happening?

The work to install a district heating network for the new development means we need to extend the area we're working on, as shown on the map below.

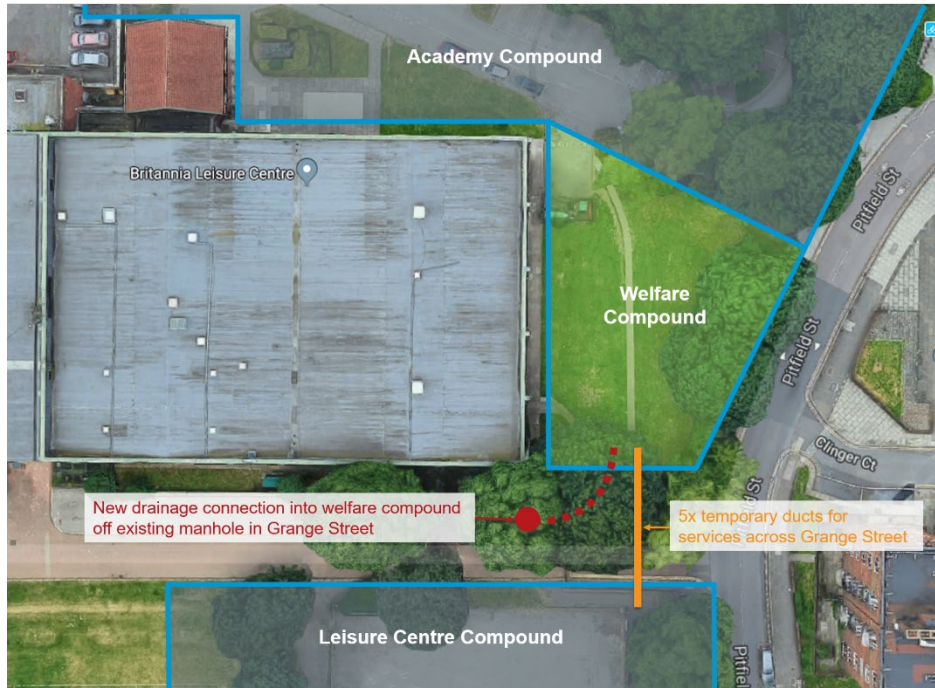

When is this happening?

In order to minimise disruption, Hackney Council has given us permission to carry out this work over the next four weekends. There will be no closures on the road on weekdays. For the next four weekends only, we will commence work on Saturdays at 8am and finish by 5pm and we will start works on Sundays from 10am and finish by 6pm on the following dates:

- Saturday – Sunday 27/07/19 – 28/07/19
- Saturday – Sunday 03/08/19 – 04/08/19
- Saturday – Sunday 10/08/19 – 11/08/19
- Saturday – Sunday 17/08/19 – 18/08/19

morgansindall.com

We will also be carrying out some service connections in Grange Street on Friday 26 July and Saturday 27 July to install new temporary services, shown on the map below.

Thank you for your patience with these works. We are installing the new services for all elements of the Britannia project in one large service trench around the site perimeter. This will contain all the water, electric, gas and district heating services, and we are doing this to avoid having to install each of the services separately – ultimately cutting down on the overall impact on the local community.

We sincerely apologise for any inconvenience this may cause and we will do our best to minimise the disruptions. If you have any queries, issues or concerns regarding the work on site, please feel free to contact me on 07976 587 990, alternatively you can email me on Dalia.Islam@morgansindall.com.

Yours sincerely,

Dalia Islam
